Greg Dukes

AI Engineer & Forward-Deployed Builder · Founder, BLKDMND · Documentary Filmmaker (BBC Reel)

Miami, FL · Open to remote/hybrid · info@gregdukesai.com · linkedin.com/in/greg-dukes-genai · github.com/BLKDMND-DIGITAL · Portfolio: gd-portfolio-wy18.vercel.app · gregdukesai.com · IMDb: nm15135596

SUMMARY

Documentary filmmaker since 2015 and founder of BLKDMND (2022) who designs, builds, and ships AI products end to end. Launched two live LLM apps, Alchemy and EmpathMath, on Gemini and OpenAI with Cloudflare Workers and Stripe. 3+ years of customer-facing freelance and paid client work. Brings a filmmaker's habit of listening first and finding the real problem before building. Seeking remote or hybrid roles between customers and code: AI engineering, forward-deployed or solutions engineering, AI workflow, and media tech.

SKILLS

- **AI & LLMs:** Generative AI · Large Language Models · Google Gemini API · OpenAI API · Structured Outputs / JSON Schema · Prompt Engineering · Model fallback
- **AI-assisted development:** Claude Code · Cursor · ChatGPT · GitHub Copilot · Microsoft Copilot Studio · Microsoft 365 Copilot
- **Languages & frameworks:** TypeScript · JavaScript · Python · Swift / SwiftUI · React · Node.js · Fastify · Zod
- **Platforms & data:** Cloudflare Workers · Cloudflare Pages & Pages Functions · Cloudflare D1 · Stripe API · PostgreSQL · Vercel · AWS (S3, CloudFront, Route 53)
- **Media:** Documentary Filmmaking · Video Production · Storytelling · Adobe Premiere Pro · Adobe After Effects · FFmpeg · Blackmagic · Sony FS700 · Atomos

EXPERIENCE

Founder & AI Engineer — BLKDMND (Independent)

Mar 2022 – Present · Remote

- Founded BLKDMND to build AI products and media tools; freelance and paid client work since 2022.
- Design, build, and ship AI tools end to end: two live LLM apps, a live consulting site with a custom booking flow, a legal-evidence prototype, and an internal governance control plane for my AI agents (see Selected Projects).
- Built code-driven video pipelines (Node + sharp + ffmpeg; HeyGen HyperFrames; Python + OpenCV + MoviePy) that render brand deliverables in multiple aspect ratios from one source.
- Develop daily with Claude Code, Cursor, ChatGPT, and GitHub Copilot; hands-on with Microsoft Copilot Studio and Microsoft 365 Copilot.
- First set up my portfolio on AWS (S3, CloudFront, Route 53), then moved it to Vercel to host it for free.

Documentary Filmmaker & Media Producer (Independent)

Jan 2015 – Present

- **Frisson** (BBC Reel, 2022; republished 2023): credited as producer and presenter; also researched, booked the interviews, and edited the film. It came from my own pitch after about two years and dozens of rejected BBC pitches. bbc.com/reel/video/p0dgrs1l/watch
- Media work spans live events, studio shoots, storyboards, and training videos.
- Shoot and finish on Blackmagic, Sony FS700, and Atomos; edit in Adobe Premiere Pro and After Effects.
- Credits: imdb.com/name/nm15135596

SELECTED PROJECTS

Alchemy — AI livestream blueprints · LIVE · tryalchemyapp.com

- Paid web app that turns a description of a stream into a full run of show: title, description, tags, checklist, and timed segments with talking points.
- Gemini 2.5 Flash behind a Cloudflare Worker with an OpenAI (gpt-4o-mini) fallback; both held to one JSON schema and normalized, with API keys kept server-side only.
- Stripe subscriptions with signed-cookie access. Native SwiftUI iOS client (StoreKit 2) built against the same backend; not yet submitted to the App Store.

EmpathMath — decode high-conflict messages · LIVE · empathmath.org

- Paste text or upload a screenshot (OCR route). A Cloudflare Worker calls Gemini server-side with a strict schema that returns each detected tactic with a confidence score and the exact evidence quote, plus tone, risk scores, and calm reply options.

gregdukesai.com — consulting site & booking flow · LIVE · gregdukesai.com

- Custom request-then-confirm booking form (no calendar embed), with availability served from a Cloudflare D1 database through Cloudflare Pages Functions, Stripe payments, and email notifications.

Swords & Shields — legal-evidence AI pipeline · PROTOTYPE · not deployed

- Four stages: Forge (ingest) → Vault (multimodal analysis) → Shield (search-grounded statute check) → Sword (Bates numbering, exhibit export). React + TypeScript + Gemini, five schema-locked calls.
- Not yet built: document retrieval, file hashing, and encryption. Not legal advice.

BLKDMND OS — governance control plane for AI agents · INTERNAL · NON-PRODUCTION

- Owner approval gates bound to the exact action before anything external happens; append-only audit/event log; PostgreSQL schema.
- Fastify + TypeScript + Zod, 81 automated test cases, no LLM calls (rule-based scoring). Runs locally; not a live service.

SPEAKING

- **TEDxNaples** — talk on frisson · Naples, FL · March 16, 2027 (upcoming)

CERTIFICATES (COURSERA COURSE CERTIFICATES)

- Introduction to Large Language Models — Google Cloud (via Coursera), Jun 2024 · Credential ID XZNUFDZF8WXA
